Presidents' Leadership Award

Curtis Pratt

Great Bay Community College

Curtis Pratt, a senior at Great Bay Community College, is a student leader active in community service and civic engagement. As a member of PTK and the Outdoor Adventure Klub (OAK), Curtis has been very active in our annual Thanksgiving basket drive and beach clean ups through Blue Ocean Society for Marine Conservation, however it is his role as president of the GBCC STEM Club that is most impressive. Under Curtis's leadership STEM will complete over 150 hours of community service this academic year including hours at Great Bay Discovery Center and Seacoast School of Technology (SST). In fact, Curtis is the driving force behind our STEM mentor program with SST! The goal of the program is to allow GBCC STEM students to serve as mentors to SST Biotechnology students. Curtis's passion for bringing about change has inspired others to get involved. Curtis will be graduating this spring with degrees in Biotechnology and Liberal Arts.
