

PRESIDENTS' LEADERSHIP AWARD

Neuropsychology Club University of New Hampshire at Manchester

After some time defunct, President Allison Dyke saw a need and combined the neuropsychology and psychology to form one club. Though this new combined club is young, they have been full steam ahead in their efforts. This club has scheduled various field trips to such places as the Warren Anatomical Museum and the Francis A. Countway Library of Medicine in order to get students to see visual representations of what they are learning. They are also active in other ways such as:

- Being instrumental in making connections within areas of study for UNHM's students. They have worked to poll the students within the classes, create study and focus groups and get information out to prospective students
- Raising awareness of mental health with the anti-stigma campaign on campus, promoting the mental health counselor hours on campus, and creating the "Day of Kindness" campaign on campus
- Hosting fundraisers for local Girl Scout Troops, Alzheimer's Foundation, and Huntington's Disease Society of American
- Actively involved with the NH Psychological Association Academic Conference both last year and again this year.
