

PRESIDENTS' COMMUNITY PARTNER AWARD

The Mental Health Center
of Greater Manchester

The Mental Health Center of Greater Manchester MCPHS University

The MHCGM has been providing essential mental health services and care to all individuals (from children to seniors) in the greater Manchester area since 1960. The organization's partnership with MCPHS includes faculty and students from the Occupational Therapy department. MHCGM teaches our students skills related to client assessment and OT for those living with mental illness, as clients receive OT group intervention on life skill, health/wellness and social participation. MHCGM supports 2nd year OT students in developing service-delivery plans, as well as programs for adolescent health/wellness, acute care OT and community based OT services. This partnership between MHCGM and MCPHS provides exceptional educational opportunities for OT students while enhancing service provided to those served by MHCGM.
